

RIAZ AHMED ANSARI

Islamabad, Pakistan | +92 339 1691825 | ansariahmed408@gmail.com | LinkedIn | GitHub

Professional Summary

Cybersecurity graduate specializing in **Red Teaming, Blue Teaming, and security engineering**, with hands-on experience in penetration testing, Active Directory security, network security monitoring, SIEM, detection engineering, threat hunting, and incident response. Built and secured **enterprise, cloud, containerized, and ICS/OT environments**, with practical expertise in DevSecOps, Linux, Kubernetes, CI/CD security, and machine-learning-based threat detection.

Certifications

Multi-Cloud Red Team Analyst (MCRTA)

CyberWarFare Labs

Certified Red Team Analyst (CRTA)

CyberWarFare Labs

Experience

DevSecOps Intern

Aug 2024 – Sep 2024

Sysreforms International

Islamabad, Pakistan

- Deployed and configured **Kubernetes and MySQL clusters** for containerized applications, reducing deployment time by **30%**.
- Integrated **Trivy and SonarQube** into CI/CD pipelines and remediated **15+ vulnerabilities**.
- Secured and troubleshooted infrastructure across **Docker, Linux, NGINX, SSH**, and CI/CD environments.

Network Security Intern

Jun 2024 – Jul 2024

HTR Technologies

Islamabad, Pakistan

- Performed network reconnaissance, traffic analysis, and security assessments using **Nmap, Wireshark, and Metasploit** across controlled environments.
- Investigated **3 unauthorized access attempts** through packet analysis, suspicious communication patterns, and attack-path analysis.
- Conducted vulnerability assessment and penetration-testing activities and designed segmented networks using **VLANs, ACLs, routing, DHCP, and NAT**.

Security Projects

SIEMTRIX | ICS Security Monitoring, Detection & Automated Response

Final Year Project | 2025 – 2026

- Designed and implemented a **Purdue Model-aligned ICS security architecture** across IT, DMZ, OT, and sensor zones, enforcing segmented IT-to-OT communication, command validation, RBAC, and centralized security monitoring.
- Engineered a **hybrid ML-based detection pipeline** integrating Splunk, Suricata, Zeek, and MITRE ATT&CK for ICS to identify anomalous and malicious activity and support graduated alerting, quarantine, and blocking workflows.
- Validated system resilience under **500 concurrent commands**, achieving **100% delivery, zero message loss, and <148 ms average latency** against a 200 ms SLA.

Real-Time ML-Based DDoS Detection System

2025

- Developed a **real-time network threat detection pipeline** for SYN flood and HTTP flood attacks, combining live traffic capture, feature engineering, and machine-learning classification for continuous attack detection.
- Engineered automated security monitoring to **identify malicious traffic patterns and generate real-time alerts**, demonstrating practical application of ML-based network intrusion detection.

Active Directory Attack & Detection Lab

2025

- Built an isolated **Active Directory attack environment** to emulate reconnaissance, credential access, privilege escalation, and lateral movement using BloodHound and offensive security tooling.
- Integrated **Windows and Sysmon telemetry with Splunk** to investigate attack activity and develop MITRE ATT&CK-mapped detections for adversary behaviors.

Technical Skills

Red Teaming & Offensive Security: Penetration Testing, Web Application Security, Network Enumeration, Vulnerability Assessment, Privilege Escalation, Active Directory, BloodHound, Metasploit, Burp Suite, Nmap

Blue Teaming & Detection: SIEM, Detection Engineering, Threat Hunting, Incident Response, Network Security Monitoring, IDS/IPS, Splunk, Suricata, Zeek, Wireshark, Sysmon, MITRE ATT&CK

ICS/OT Security: ICS Security, OT Network Security, Purdue Model, SCADA, Modbus TCP, ScadaBR, Open-ModSim, Industrial Network Monitoring

DevSecOps & Infrastructure: CI/CD Security, Docker, Kubernetes, Linux, NGINX, SSH, Trivy, SonarQube, AWS, Azure

Programming & Machine Learning: Python, Bash, PowerShell, C++, SQL, XGBoost, Isolation Forest

Education

Air University

Islamabad, Pakistan

Bachelor of Science in Cyber Security

2022 – 2026
